

St. James Parish Church Weybridge, Surrey.

The Organ was built in 1983 by Peter Collins of Redbourn, Herts., using some pipework from the previous organ, which was by Brindley & Foster, rebuilt by Norman and Beard, and Corbett & Beilby. The Chancel front dates from c1889 and was designed by John Loughborough Pearson, who designed the church. A new case with the Swell and console by Collins faces down the north aisle.

During 2012 work has been done on the organ by B C Shepherd & Sons. The rosewood key coverings were badly worn, and have been replaced with ebony. The stop knobs were refaced and re-engraved with bolder type. The organ was cleaned, and adjusted. The leather action lozenges were all replaced with new thicker ones (two for each note), as they were breaking. Extra passageboards and new ladders have been fitted. New lighting has been fitted in the organ, and new console lights fitted. The Great Trumpet which was a poor stop from the former organ was replaced with a good quality secondhand spotted metal stop. The small scale half length Pedal Fagot was remade with new larger scaled full length resonators. The pipes for this stop were made by Kevin Rutterford, and voiced by Keith Bance, who also voiced the Great Trumpet.

GREAT		SWELL		PEDAL	
Principal	8	Gedact	8	Subbass	16
Stopt Diapason	8	Viole	8	Octave	8
Octave	4	Principal	4 *	Gemshorn	4
